

## RETURN TO COMPETITION POLICY

DRAFT

A concussion is a serious event, but you can recover fully from such an injury if the brain is given enough time to rest and recuperate. Returning to normal activities, including sport participation, is a step-wise process that requires patience, attention, and caution.

**Each step must take a minimum of one day but could last longer, depending on the player and his or her specific situation.**

### **Step 1: No activity, only complete rest.**

Limit school, work and tasks requiring concentration. Refrain from physical activity until symptoms are gone. Once symptoms are gone, a physician, preferably one with experience managing concussions, should be consulted before beginning a step wise 'return to play' process.

### **Step 2: Light aerobic exercise.**

Activities such as walking or stationary cycling. The athlete should be supervised by someone who can help monitor for symptoms and signs. No resistance training or weight lifting. The duration and intensity of the aerobic exercise can be gradually increased over time if no symptoms or signs return during the exercise or the next day.

**Symptoms?** Return to rest until symptoms have resolved.  
If symptoms persist, consult a physician.

**No symptoms?** Proceed to **Step 3** the next day.

### **Step 3: Sport specific activities.**

Activities such as skating or throwing can begin at step 3. There should be no body contact or other jarring motions such as high speed stops or hitting a baseball with a bat.

**Symptoms?** Return to rest until symptoms have resolved.  
If symptoms persist, consult a physician.

**No symptoms?** Proceed to **Step 4** the next day.

### **Step 4: Begin drills without body contact.**

**Symptoms?** Return to rest until symptoms have resolved.  
If symptoms persist, consult a physician.

**No symptoms?** The time needed to progress from non-contact exercise will vary with the severity of the concussion and with the athlete.  
**Proceed to Step 5 only after medical clearance.**

### **Step 5: Begin drills with body contact.**

**Symptoms?** Return to rest until symptoms have resolved.  
If symptoms persist, consult a physician.

**No symptoms?** Proceed to **Step 6** the next day.

### **Step 6: Game play.**
