Lone Worker

Complete Safety Monitoring For Effective Emergency  
Resolution

Are All Your Workers Safe?

What If This Worker Was Alone?

Are you compliant with  
Provincial regulations?

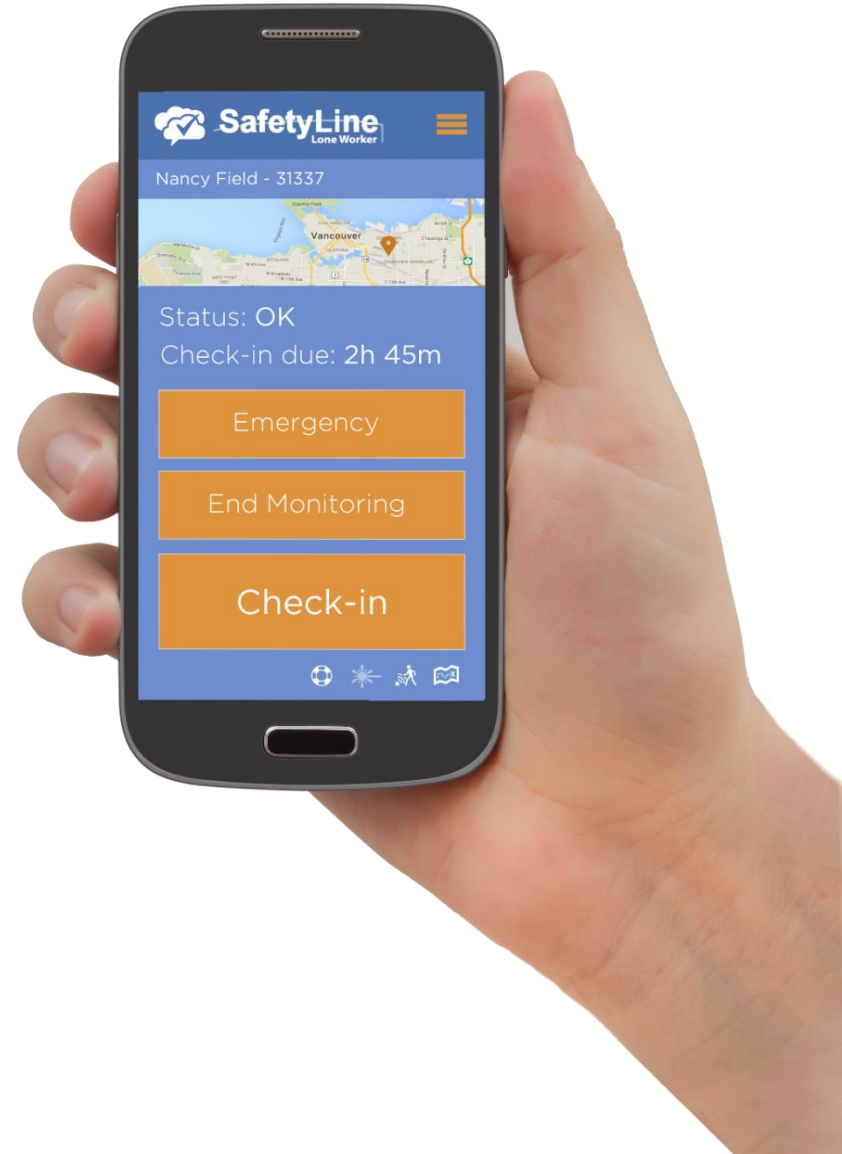

# WORK ALONE SAFETY POLICY

- Who will monitor the worker?
- Duration of check-in intervals?
- What information is needed at check-in?
- All information logged?

Safety Feature	All Solutions	Good Solutions
Check-ins at set intervals	✓	✓
Monitoring 24/7	✓	✓
Employee can manually send emergency alerts	✓	✓
GPS location of worker		✓
Automatic emergency alerts triggered by events		✓
Monitoring does not cease when device is broken		✓

- Fully automated
- Reports on Demand

# Next Steps

The tablet screen displays the SafetyLine Lone Worker web application. At the top, the user 'Bruce Thompson' is logged in. The main profile for 'John Miller [1001]' is shown, including a photo, status ('OK since 2h 31m ago'), and contact information. Below the profile is a 'User History' section with a table of events and a map of Fort Saskatchewan, Alberta. The background of the image shows a red hard hat, yellow work gloves, and architectural blueprints on a wooden surface.
